

Fact Sheet

Upgrade Signalized Intersection Improvement along Peck Rd and Santa Anita Ave CIP 040

Project Description

This Project upgrades signal hardware and pedestrian countdown heads at eighteen (18) signalized intersections along Peck Road and eleven (11) along Santa Anita Avenue. Proposed improvements help visibility of intersection signals to aid driver's advance perception of the upcoming intersections and minimize pedestrian and bicyclist collisions by reducing conflict points between vehicles and non-motorists and assure pedestrians sufficient time is provided to cross the street.

Status

Planning/Design

Schedule

Design: Complete Summer 2025

Construction: Begin Spring 2026
