

Peck Road TSSP - Hemlock Street to Workman Mill Road

- **Project Scope:**

This project will synchronize traffic signals along the Peck Road between Hemlock Street and Workman Mill Road. It includes upgrading intersections along the corridor to allow for synchronization as well as upgrades requested by the Cities involved. This project is part of the Countywide Traffic Signals Synchronization Program that aims to reduce delays along corridors and vehicle emission by reducing idling times.

- **Project Benefits:**

The TSSP project will significantly reduce delays and accidents, thereby improving motorists' driving experience, reduce pollution and operational costs.

- **Community Engagement:**

Community engagement will be conducted as appropriate.

- **Project Location:**

Along Peck Road between Hemlock Street and Workman Mill Road in the Cities of El Monte, South El Monte and Industry and in the Unincorporated Communities of Whittier and Whittier Narrows

- **Cost Estimate:**

- Total Project: \$3,400,000
- Construction: \$2,000,000

- **Economic Impact:**

Project construction supports direct and indirect jobs.

- **Schedule:**

- Final Plans – Dec 2023
- Advertise for Construction Bids – Sep 2025
- Start of Construction – Jun 2026

Note - Dates subject to change
